

# Consort Express Lines Limited

## **Safety and Environmental Policy**

**Consort Express Lines Limited has identified safety and the environment as two key areas in its sphere of operations that are of paramount importance. The need for these key areas to be effectively controlled preventing unnecessary injuries, loss of life, and damage to health, property and degradation of the environment is a priority for all personnel.**

To meet this requirement the Company will ensure that its activities are sufficiently controlled to protect personnel, property and the environment. All risks and hazards are identified and controls determined and where employee input or new technology can be applied then it is reasonably expected that work practices will be improved to reduce potential impact.

The Company recognizes that an effective safety and environmental protection program makes for a more profitable operation thereby ensuring the welfare of all involved in the business.

Effective Safety and Environmental management is the concern of all and has no rank. However, to be effective it has to be the Management led.

To this end, Management is committed to:

- Making all personnel more safety and environmentally conscious by encouraging all to become actively involved in identifying possible hazards,
- Implementing preventive and corrective action, and
- Constantly monitoring all facets of their working environment to ensure safety conditions prevail and environmental impacts are minimised.

An incident is indicative of a failure in the operating system. The Company is committed to fully investigating all safety incidents or environmental impacts. The results of such investigations and any necessary preventive action will be brought to the attention of all concerned so that lessons may be learnt from the incident including any corrective actions that may require implementation after further analysis of failures.

Learning is a never-ending journey on the road to excellence. Effective training is fundamental to the Company's business and its responsible safety and responsible environmental management culture. As our standards improve, new goals and targets will be set to which all personnel shall strive to attain.

Stuart Craker  
General Manager
